EV Technician Job Description

Friday, January 29th 2021

Job Description
We are hiring a vehicle service technician with a focus on electric vehicles. In this position, you will work on converting gas and diesel vehicles to electric. You will be removing engines, performing suspension, brake and tire service as well as assembling and installing new components.

Desired Skills
1. At least 5 years of automotive service experience.
2. Ability to read and execute service procedures.
3. Organization and attention to detail.
5. Basic fabrication and shop skills preferred.
7. Understanding of high-voltage safety procedures preferred.

Pay Range
$17-23/hr depending on incoming skill level. Training on new technologies, hybrid and electric vehicle systems are a part of this position but are also key skills we are looking for.

Application Instructions
Portfolio: Please collect a basic portfolio of experience, pictures and descriptions encourage. Demonstrate some cool things you’ve done that would be relevant to working on cars.

Personal Statement: Describe why you want to work for Maxwell. Describe what you look for in a workplace and what kind of perspective you bring.

Resume: Please include a basic resume with at least the last 2 years of work experience and any educational experience.

Please email applications to Max at: mpfeiffer@maxwellvehicles.com
